Alex Siebenaler

Honors 202

Why Honors?

Why Honors?

My name is Alex Siebenaler, and I am from Hastings, MN. I have a family of 5, my mom Jennifer, my dad Patrick, an older brother who is 21 and his name is Ben and an older sister who is 20 and her name is Maggie. I also have a pet wiener dog named Dexter. I played Football, Basketball, and Lacrosse in high school but am not continuing any of them in college. I played basketball the longest but enjoyed playing lacrosse the most. I did a little bit of PSEO in my time at high school as well, so I have a little idea of what I am doing. I am going to be studying aviation here at Mankato in hopes of pursuing a career as a commercial pilot in the future. In my free time I have always enjoyed being active in all sorts of ways, whether that being playing sports, going on hikes, hanging out with friends, or anything else, I have had joy in them all. I have always enjoyed being busy so most of my hobbies and activities fall under that. In the wintertime, I also enjoy skiing and hope to do some this upcoming winter. With this I also really enjoy traveling all over. I have been to a couple different countries and all over the US and am hoping to be able to travel more in the future.

I decided to choose to be in the honors program for a bunch of different reasons, not just a specific one. One reason I chose to do this program is to stand out in my major. I also have always enjoyed a challenge. I was an NHS officer in high school, so I am familiar with the aspects of an honors program and want to continue this in college. Another reason for me to be

in the honors program is to be more involved on campus and meet more likeminded individuals like me. I am excited for this program. Lastly, my dad suggested it to me to keep me on track with my classes and to make sure I continue my good work ethics in college.

I want my experience in college with this honors program to be impacted, but not changed. I want to continue hanging out with my friends and doing activities, but want to begin to be open to more than I already am. I think with this honors program I will grow in community activities and helping others, apart from just doing things that I want to do. I hope to become more involved on campus with this change as well as build a solid group of people to surrond myself with.

This program will shape me personally by continuing to grow my work ethic and my strive for greatness. I also feel like it will help me grow in other areas of my life. Keeping me motived, the honors program here should help me in the gym, in my faith, in my work studies, and really keep me healthier personally. The traits I hope to develop in these next four years through the honors program will be great for everything down the road. Professional, I am planning on going into aviation, so hopefully with this I am more prepared for checkrides and interviews. It will also be a better look on my resume, hopefully, and set me apart from other candidates looking for a similar job as me. I am excited for this program, as well as a little nervous for it all but hopefully it works out well for me and all my classmates.
